Summary

Software Engineer with hands-on experience building scalable backend and full-stack applications using ASP.NET Core, Angular, and Node.js. Strong foundation in REST APIs, authentication/authorization, and clean architecture, with proven problem-solving skills from competitive programming and production-grade projects.

Experience

Freelance Full Stack Developer

2024 – Present

Freelance

- Designed, developed, and deployed full-stack web applications for small businesses using ASP.NET Core, Node.js, and SQL/MongoDB, covering authentication, CRUD operations, and deployment.
- Collaborated with clients to gather requirements, deliver features, and maintain production systems.

Information Technology Institute (ITI)

Jul 2025 – Jan 2026

Intensive Training Program (ITP) – Fullstack .NET & Angular Track

Port Said

- Built full-stack applications using ASP.NET Core APIs and Angular, applying SOLID principles and layered architecture.
- Worked on team-based projects following Agile methodology.

Elmasria for Science and Technology

2022

Desktop Development Intern

Port Said

- Built basic desktop applications in C# using Windows Forms.

Education

Suez Canal University

Sep 2020 – Jun 2024

Bachelor of Computer Science, Grade: Very Good

Ismailia

- Graduation Project: Doctorz – Excellent grade 🏆

Competitions

Egyptian Collegiate Programming Contest

2021 – 2023

Competitive Programming

- Participated in ECPC for three consecutive years, strengthening algorithmic and problem-solving skills.

ICPC Assiut Newcomers Training

2022

Problem Solving

- Solved over 200 problems and practiced algorithmic thinking using C++ and Python.

Projects

KickZone | ASP.NET Web API, SQL Server, Entity Framework, Angular, SignalR, Redis, Hangfire 🏆

Nov 2025 - Jan 2026

- Built an end-to-end football field booking platform using Angular and ASP.NET Core Web API.
- Implemented real-time slot availability and concurrency handling using SignalR to prevent double booking.

Factory Monitoring API | Node.js, Express, MongoDB, Mongoose, Joi, Nodemailer, Cloudinary 🏆

Nov-Dec 2025

- Built a production-ready Factory Monitoring REST API using Node.js/Express and MongoDB (Mongoose), delivering authentication, machines, shift reports, tickets, and dashboard analytics modules.
- Developed analytics-heavy dashboard endpoints using MongoDB aggregation pipelines with filtering, pagination, and sorting; computed operational KPIs plus reliability metrics for maintenance insight.

Doctorz | Node.js, Express, MongoDB, Mongoose, Paymob 🏆

Oct 2023 – Jun 2024

- Designed and implemented a RESTful API for doctor appointment booking with user, doctor, and admin roles.
- Integrated Paymob payment gateway and implemented JWT-based authentication and authorization.

Skills

Languages: C#, TypeScript, JavaScript, C++, Python, SQL

Frameworks: ASP.NET Core, Angular, Node.js, Express, Entity Framework Core, MongoDB, SQL Server, Redis, Hangfire

Tools & Concepts: Git, Postman, REST APIs, JWT, Clean Architecture, SOLID, Agile
